Root Crop Solutions

SGHT-75-2R

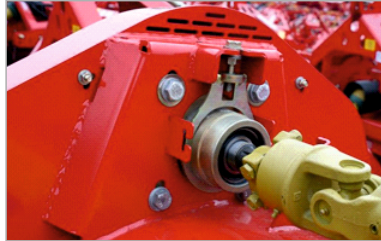

Uniform power transmission

The 4-fold V-belt drive ensures an even transmission of the required torque.

Single drive with free wheel

The freewheel in the drive train reduces the load on the PTO shaft and the drive shafts when disengaging at the headlands.

Cleaning made easy

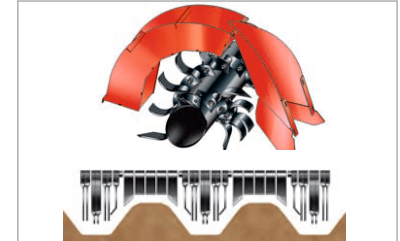

Two large cleaning flaps allow an easy cleaning of the inside.

Height adjustable

The support wheels are equipped with a spindle for stepless height adjustment. In addition, pendular support wheels can be selected, which allow steering movements.

The Flail Shaft

Powerful: Large diameter flail shaft is impressive because of its smooth running and stability. Shear blades ensure effective chopping. By far better: optimum flail blade arrangement to suit the rows
